

# SYNECTICS

## Scene Check

Scene Check transforms casino security by automating surveillance camera verification, drastically cutting inspection time to just minutes while significantly boosting accuracy and operational efficiency.

## Why Use Scene Check?

### Save Time

Check thousands of cameras in minutes and receive real-time alerts for efficient fault management.

### Manage Camera Health

Provides detailed reports identifying cameras that require attention, enabling quick and effective maintenance.

### Automate Inspections

Automatically verifies camera alignment and functionality, eliminating the need for manual inspections and reducing human error.

### Tailor to Your Operations

Designed to adapt to your camera estate, allowing for customised schedules and group-based checks tailored to specific security needs.

## Key Features

- **Cutting-edge algorithms detect even minor misalignments and obstructions in camera feeds**
- **Real-time data processing immediately identifies changes in Field of View, lighting, and focus**
- **Automated Field of View Comparison**
- **Identifies glitches, focus/blur issues, and other factors that affect camera performance**
- **Stand-alone technology, independent of existing VMS**
